Bornhack is a 7 day outdoor camp where hackers, makers and people with an interest in technology and security come together to celebrate technology, socialise, learn and **have fun**.

It takes place for the first time from **August 27 to September 3rd 2016** on the Danish island **Bornholm** where we have found the geography as well as backbone to make it happen.

Bornhack is a **participatory** event where we expect people to come up with ideas and projects for the event. We will reach out to people to ensure interesting, high quality talks and workshops.

We will continuously be updating our website **https://bornhack.dk** (**http://bornhack7hctgpio.onion/**). Remember to check it out frequently to keep yourself updated about the event itself, ticket sales, etc.

You are also very welcome to ask questions and show your interest on IRC at **#bornhack** on **irc.baconsvin.org** (**6nbtgccn5nbcodn3.onion**), using TLS on port 6697. That way you can help us understand what you think would be fun to do. This is a new event, so we don't yet know exactly where this is going – but give us your feedback and you can help us form it.

We hope you want to be a part of Bornhack.

Sincerely
The Bornhack Team
