BornHack is a 7 day outdoor tent camp where hackers, makers and people with an interest in technology or security come together to celebrate technology, socialise, learn and **have fun**.

We are preparing BornHack 2017 "Make Tradition" which will take place from **22nd to 29th of August 2017**, returning to the beautiful nature on the Danish island of **Bornholm**.

We will organise interesting, high quality talks and workshops. But BornHack is a **participatory** event, so we expect participants and villages to come up with ideas and projects as well.

You can keep yourself updated on our website at **https://bornhack.dk** or **http://bornhack7hctgpio.onion**. Remember to check it out frequently for news about the event, ticket sales and speakers. You can also follow us on Twitter using **@bornhax**.

You are welcome to ask questions and show your interest on IRC at **#bornhack** on **irc.baconsvin.org** (**6nbtgccn5nbcodn3.onion**), using TLS on port 6697. Let us know if you have an idea that would be fun, educational, interesting or provocative to do. We also need volunteers for different areas of the event.

We hope you want to be a part of BornHack!

Sincerely
The BornHack Team
