

Info desk CERT list:

Wounds:

If the wound is not bleeding large amounts of blood, or visibly infected, hand out a bandaid and tell them to wash their hands.

Burns:

Call CERT for a check.

Headaches and pains:

Tell them to go get some water and salt, hand out a electrolyte tablet and instruct them to put it in 0.5L's of water and drink it all. General painkillers like Paracetamol can be handed out if needed.

Tics:

Hand out tick removal kits and instruct them to get a friend or family member to help them remove it.

Insect bites:

Call CERT for a check.

Loss of consciousness:

Always call CERT!

Hand out bandaids and stuff from the grey box in Info for things people can handle on their own. (Make sure to write down what you've given out so i know what to restock.)

If you judge it to be an emergency requiring an ambulance, just call 1-1-2 immediately.

In general use your best judgement, is it something people can handle on their own, or should have handled before coming to Bornhack, there is no need to call CERT. If you judge it to be needed call CERT, we can't see the injury so you decide if it's necessary or not.

Ambulance/Emergencies: Call 1-1-2 (Make sure to give them your name, location and injury type.)
